## Artist Statement

As an artist, I have always been captivated by the human figure, endlessly exploring its forms and expressions through my paintings. However, my practice has driven me to seek new ways to explore the depth and meaning of it.

In my exploration, abstraction gradually took precedence, leading the painted figures to immerse in an intense abstract environment. This unexpected shift revealed to me a personal need to pursue balance and meaning between these two seemingly opposite elements.

Ultimately, my work serves as a reflection of this ongoing quest for balance and significance, inviting viewers to contemplate the complexities of life and find resonance within their own experiences.
